RE: Accelerating Wireless Broadband Deployment by Removing Barriers To  
Infrastructure Investment--WT Docket No. 17-79--Request for Reconsideration and Stay

Dear Sir/Madam:

I hereby request reconsideration and a stay of the Federal Communications Commission's March 30, 2018 decision in the above-referenced matter. The Order dispenses with pre-deployment environmental and historic preservation reviews of many next generation wireless facilities.

The FCC has ignored the public health and environmental risks associated with radiofrequency (RF) radiation for far too long. This unregulated exposure is a crisis and will get worse. Why is the FCC ignoring the science and the findings of the National Toxicology Program? This and other scientific studies prove that RF radiation causes cancer, biological effects and environmental harm.

Please reconsider the Order and issue a stay until the Commission completes its review of this and other requests for reconsideration. I also incorporate by reference the Request for Reconsideration and Stay submitted in this proceeding by Edward B. Myers on May 29, 2018.

For the convenience of the Commission, I have submitted a copy of Mr. Myers' Request for Reconsideration and Stay with this filing.

Respectfully,

Michele Hertz
